Comprehension Check

Read the given passages and answer the questions.

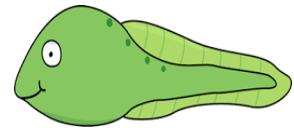

Every spring Bilal and his brother Asim go to the pond at the end of their street to look for tadpoles. They love to catch them so they can watch them turn into frogs.

This spring when Bilal and Asim go to the pond to catch tadpoles, they see a turtle sitting on a log enjoying the sun. "Look at the cool turtle," says Bilal.

"Should we try to catch it?" Asim asks. Bilal responds, "I like catching tadpoles better." Asim agrees with Bilal.

They fill their bucket with tadpoles and head home. When they get there, they empty the bucket into a big, wide tub. They cover the tub with the screen so animals can't get to the tadpoles. They keep the tub in the shade so the water does not get too hot.

Asim and Bilal go to the pond every day to bring back fresh water and leaves from the bottom of the pond for the tadpoles to eat. After six weeks, the tadpoles grow into frogs. Then Asim and Bilal take them back to the pond so they can live happily ever after.

1. Why do Bilal and Asim like to catch tadpoles?

2. What do they see sitting on a log?

3. Where do they keep the tub of the tadpoles?

4. What do they do once the tadpoles grow into frogs?

5. Have you or your family members ever kept any animal?

Share your experience.

Read the passage and answer the questions.

Mother and I baked a pie. We baked an apple pie. I do not like blueberry pie. First, we made the pie crust. Then we put the filling in the crust. Next, we baked the pie for 30 minutes. After dinner, we ate the pie for dessert.

Who baked a pie?

Things Required

- Body Lotion
- Body Powder
- Small Brush
- Scotch tape
- Black construction paper

Procedure

1. Rub a small amount of lotion onto your hands.
2. Find a small surface area in your kitchen (e.g. a section of countertop).
3. Press your fingers to the selected surface, leaving behind your prints.
4. Now, sprinkle a small amount of powder at the area having your fingerprints.
5. Brush away the excessive powder gently. Make sure your fingerprints remain intact.
6. Then, place a piece of scotch tape on the powdery prints, leave it for some time and then pull it off.
7. Now, Place the tape on a piece of black construction paper to see it more clearly.

Family Fun

Bones and Muscles

Things required

- modelling clay of various colours
- toothpicks

Procedure:

1. Shape a robot from a lump of the clay by giving it thin legs and arms.
2. Put a large head on its shoulders and squish the head flat with your thumb.
3. Now, break a few toothpicks into different sizes.
4. Then, make another robot from the clay.
5. This time, insert the toothpick pieces inside each body part of the robot (like our bones).
6. Then, try to stand both of the models on their own and see which one can stand well.

Result

Did the toothpicks help the second robot stand up?

Life Cycles

Let's make a frog's life cycle model by using some recycling material.

Things Required

- Chart Paper
- 3 disposable spoons
- 1 disposable cup
- Watercolours
- Paintbrush
- Googly eyes
- Beads
- Glue
- Marker or crayons

Procedure

1. Paint two disposable spoons and one spoon green with the help of paintbrush. Now, paint a disposable cup green.
2. Break the green spoon into two halves (as shown in the picture).
3. Now, glue the googly eyes on each spoon and the cup to make the eyes of a tadpole (black spoons), froglet (green spoon) and frog (green cup).
4. Then, glue all the stages of frog's life cycle on the chart paper in the correct sequence. (You may use beads to represent the eggs of a frog).
5. Finally, draw arrows with the help of a marker or crayons to complete the life cycle of a frog.
